

MCS Mentorship Programme 2016-18
Job Shadowing Programme
“Passing on the Maryknoll Spirit”

Students’ sharing after the Job Shadowing Programme

Job 1

Ansy Wan 5C (25)

This precious chance boosted my interest in working in the aviation industry. I strongly recommend our school hold this activity again so that students can understand more of their ideal occupation.

Hayley Chan 5B (03)

The seven-hour stay at Brilliant Jet's office was an entirely new experience for me. I gained something that cannot be learnt from school. I am very thankful that the school has given us such a great opportunity.

Breanne Choi 5D (08)

I've learnt that working is not as easy as I thought.

Job 2

Isra Lai 5A (11)

I learned about how the fashion industry is operated and its recent changes. The staff at Ethno discussed career choices and university programmes with us, which made me more confident about my future career pathway / preferred field.

Job 3

Vincy Tam 5C (20)

The investment bank I visited hires a diverse range of employees, but they all have one thing in common – they are all top students and very hardworking. This programme has given me an opportunity to understand more about my ideal job and helped me pursue my dream in the future.

Christine Ho 5B (16)

During my visit to Goldman Sachs, I met people from different departments, such as the financing group and the structures credit trading securities division, and learned about their daily duties, including giving clients advice on financial planning and investment on bond and securities.

Job 4

Phoebe Ma 5D (14)

What I have learnt from my mentor is that when you want to achieve high, you need to bear a higher risk, so it is prominent for you to think carefully before you act.

Michelle Choi 5E (06)

The alumnus was willing to share everything with us, ranging from their personal stories, to their career experiences. I am grateful to the mentors who are very passionate in helping younger Maryknollers.

Job 5**Amelie Chan 5B (01)**

It was an extraordinary day for me -- my schoolmates and I analyzed a case on family law; we got to sit for a murder case in High Court and meet and talk to a judge in service; we solved a case on tort law under Mr. Sean's guidance. It was an amazing once-in-a-lifetime experience that I will hardly forget.

Stephanie Young 5C (31)

I not only experienced what it's like to be in a court, but also acquired important knowledge on law and learned how to think critically like a lawyer when analysing tricky cases. It made me love law more and helped me overcome some of my uncertainties regarding future career.

Rosaline Chan 5B (07)

The job shadowing experience was an inspiration and motivation for me. My desire to get into a law degree program became stronger.

Sharon Chan 5A (03)

It was an extraordinary experience that no lesson at school can provide me with. I was grateful for the opportunity to have a closer look of the work of solicitors.

Charmaine Yu 5C (32)

My group was fortunate enough to have met our mentor, Ms. Angela Ho, who shared with us her career pathways, some problems companies may face and are facing, and the potential struggles the new generation of lawyers may face. Overall, the session was wonderful and informative.

Cheris So 5E (22)

Ms Angela Ho's genuine sharing touched me, inspired me, dismissed my unrealistic fantasies and clarified my misunderstandings of being a lawyer. It was a great exposure to the field.

Job 6**Sarah Fang 5A (06)**

It has given me a new perspective to know how companies tackle with existing problems and introduce new plans for the future development of the company. This programme gave me inspiration on my career planning.

Cynthia Shum 5D (17)

It was a unique experience to live a dynamic day of a CEO. I have known more about how a company operates, including its structure, division of labour between departments, corporate responsibilities etc. The people I met were indeed role models to learn from.

Ariel Fan 5B (14)

Touring around the company and joining Ms Ko at work allowed me to gain a better understanding of an office work environment and grasp a faint yet clear idea of being a CEO. It amazed me how Ms Ko is capable of overseeing bits and tips coming from different departments.

Aida Belle Lee 5E (16)

Through the job shadowing programme, I can feel the amazing spirit of Maryknollers. I am honoured to have learnt from our alumni and listen to their stories.

Tiffany Yeh 5D (28)

I really recommend next year's F.5 girls to join the job shadowing programme. I am sure they will have an eye-opening experience like I did.

Alison Suen 5E (23)

In the visit to my mentor's company, I learnt about her problem solving skills and the attitude we should have when facing a crisis.

Job 7**Connie Chan 5D (01)**

Watching Angela's interaction with her colleagues, I realized the importance of interpersonal skills.

Job 8**Janet Cheng 5C (04)**

I realized that it takes much more than just grades to become a good doctor. A compassionate heart, willingness to listen and learn, and a strong faith are essential.

Bobo Tsang 5D (19)

After this programme, I learned more about being a doctor and I am going to work hard to be one. I hope there will be more similar activities for other Maryknollers to join.

Job 9**Yanny Wong 5D (26)**

The visit has really given me unique and practical insights of the work of a doctor.

Christy Choy 5E (07)

Despite her heavy workload, my mentor showed her professionalism and concerns for her patients, which inspired me a lot, and reminded me about what a doctor should act like. This experience further encouraged me on pursuing a career in the medical field, especially in specialists involving more interactions with patients.

Job 10**Joyce Yeung 5A (32)**

This experience raised my interest in being an architect and motivated me to do my best to become one as well. I am excited to be able to meet my mentor again in a future architecture project which she involves in.

Mariana Leung 5B (25)

I was excited to see the clean and stylish working environment of architects and interior designers. Seeing their design work pinned on the boards of the office made me smile.

Winnie Chung 5E (09)

Thanks to the organizing committee and our mentors, I was able to experience a day of being an 'architect' and to learn more about this field. Fascinated by the atmosphere and the projects the architects I met were engaged in, it is now certain for me to say that I would like to be an architect in the future.

Job 11

Samantha Li 5C (14)

I have learnt more about what a translator does as well as how one works. This aroused my interest in being one.

Celine Tsoi 5C (24)

I have learnt a lot about translating after a lovely encounter with Ina.

Organised by

Maryknoll Convent School (Secondary Section)
