

## Morgan Stanley Technology High School Engagement Event

Our school was one of the three schools in Hong Kong invited by Morgan Stanley to participate in its Technology High School Engagement Event held on 23 September. At the online workshop, our students were introduced to many concepts related to modern investment banking, such as coding and trading systems. During the hackathon, participants were tasked with designing and coding an effective trading system, which was a challenging and eye-opening experience. Our students enjoyed the workshop immensely and are very grateful for the opportunity to learn from the friendly employees of one of the world's leading investment banks.

A low-angle photograph of a Morgan Stanley building facade. The building is dark with a grid of windows. The sun is shining brightly from behind the building, creating a lens flare effect. The text "Morgan Stanley High School Engagement Event" is overlaid in a white serif font on a semi-transparent blue background.
